ATP Management

UNDER CONSTRUCTION

ATP Management and Case Management (Manage Case) is still a work in progress, as well as the topics provided to you in this folder.

Please be patient as we continuously improve the content.

ATP Management has replaced ATP Community in Salesforce but you will still have the ability to manage the operations of your ATP business and easily communicate with the Third Party Administration (TPA).

ATP Company

ATP Management in MAX consists of the ATP Company service.

The ATP Company service allows users to complete tasks such as:

- Add new locations or apply to offer more services
- Manage new and existing employee information
- Update ATP information
- View tasks and announcements from TPA
- Upload important documents (example: bond or insurance documentation)
- View uploaded information from TPA (example: inspection results)

For additional information, see the [ATP Company Details](#) topic.

Case Management

Case Management is another part of MAX that will affect ATP Management. ATPs will use the Manage Case service to open a case when a new ATP location is requested, to relocate a location, add employees, or etc.

For additional information, see the topics located in the [Case Management](#) folder.

Training Video or Slides

The [ATP Management Training Video for ATPs](#) and [Slides](#) covers the basics of the ATP Company and Case Management.
