Mobile ID

Mobile ID (mID) is a voluntary, secure, digital version of your ADOT MVD-issued DL or ID that is carried in an app on a smartphone. mID carries the same legal weight and backing as the physical driver license and can be used as proof of identity in-person and online. See [Arizona ID in Mobile Wallets](#) topic for additional information.

Mobile ID will not display 'limited term' wording for individuals with a limited credential.
Expired credentials will not appear in the app.

Mobile ID can be used for:

- Certain services that require enhanced authentication on AZ MVD Now to verify the user's identity
- In-person when you need to provide proof of identity (e.g., in a MVD/ATP office)

Until Mobile ID acceptance grows, a physical ID should still be carried.

mID is not available for customers with the ACP Characteristic.

Direct customers to mobileID.az.gov for additional information regarding mID, including:

- Additional information on why it was created
- A 'How to Activate' video
- A 'How to Verify' video
- FAQs

View the **Mobile ID Demo and Tour of App** video below (from YouTube) to see mID in action.

Mobile ID and Idemia

Mobile ID is provided and maintained through Idemia. Therefore, Idemia has its own [mID Help](#) for **customers** on issues with setting up and using mID. The help site includes:

- Troubleshooting
- FAQs
- Live chat
- Email address in order for the customer to email Idemia directly
