

You are here: Finance & Cash Management > Request Customer Disbursement

Request Customer Disbursement

If a customer has an unused balance on a Prepaid Voucher or a balance in their Customer Account, those funds can be returned to them using the **Disbursement Request** feature.

The customer has the option of either receiving a check, or to have the disbursement credited to their bank account (this option only available when submitted by customer).

Organizations will only be able to receive Check Disbursements, unless they have the Trusted Organization Characteristic on their Customer Record. See [Trusted Organization](#) for more information.

Check disbursements are usually received within 7-10 days.

A Disbursement Request can only be made 7 days after the original account funding as an anti-fraud measure. If the request is made within 7 days of account funding, you will get an error. This does not apply to Registration Credits or other MVD refunds. Disbursement requests for those funds can be made immediately.

If the customer funded their own account, and had no MVD Refunds or Credits, they will only be able to make one Disbursement Request in a 30-day period. Additional Disbursement Requests from the account may be made for each MVD Refund or Credit to the account.

- Example: a customer received 6 plate credits in one month, so MAX will allow 7 Disbursement Requests (Number of MVD Refunds/Credits + 1)

If the customer contacts the MVD as to why they have not received their disbursement checks that have already been processed, the customer or CSR can email the Refund Unit at ADOT_PFTO_Refunds@azdot.gov (preferred method of contact) to inquire, or call at 602-712-7507.
