

You are here: Finance & Cash Management > Balance Cash Drawer

Balance Cash Drawer

At the end of their shift the CSR balances their cash drawer, which confirms the amount of the cash drawer matches the amount the system has recorded as collected for services throughout the day.

The CSR returns the physical Cash Drawer to the Accountant and they count out and confirm ending cash. The Accountant accepts the Balanced or Unbalanced Cash Drawer back from the CSR. If unbalanced, the Accountant will work to balance or make necessary adjustments to balance.

If an error is discovered after the CSR has submitted their Balanced or Un-Balanced drawer, but BEFORE the accountant clicks the Accept button, the CSR can use the Balance Cash Drawer steps and MAX will allow the starting over of balancing (as if it were the first time). This will allow the errors to be corrected.
