

You are here: Finance & Cash Management > End of Day Closing

End of Day Closing

The Accountant uses the consolidated (all CSR) End of Day Closing view in MAX to ensure all cash drawers are balanced and accepted. When all drawers are collected and each shows a status of Accepted - Balanced, the [Balance Vault](#) option becomes available.

When completing End of Day accounting processes, all subsequent steps (Deposit Slip, Rollup, and Balance Vault) will automatically flow in MAX from the End of Day Closing screen.

As a Best Practice, remember to **Return** any Cash Drawers that were issued in MAX but did not have any payment activity. You will Return Cash Drawers from the [Issue Cash Drawer](#) area of MAX, and then return to End of Day Closing.

- ▶ **Printing Balance Receipt**

Receipt Management

Receipt Management allows the Supervisor or Accountant to correct payment method errors to a specific receipt, which may create any potential non-cash related over/short situations found during End of Day Balancing, so the drawer can be balanced and rolled up. Receipts may be reviewed prior to making an adjustment.
