Internal Office Notifications

Individuals in certain roles, such as supervisors or managers, can use MAX to send notifications to team members. These are not meant to replace email or other sources of communication. They are designed to provide a quick, simple way to communicate to teams or individuals who are logged into MAX. There are two types of notifications: **Alerts** and **In-App Messages**. Notifications are brief messages (limited to 256 characters) that expire after a specified amount of time.

- **Alerts** only appear on the CSR's screens if they are logged in to MAX. Alerts pop-up on top of any existing activity CSRs are working on in MAX, without impacting what the CSR is doing. The alert appears once and disappears when the alert box is closed. Alerts are good if you need to communicate about a topic happening in real time, for example:
 - Alert to Team : "Our Huddle will start at 7:45 instead of 7:30 today".
 - Alert to Individual: "Sarah, when you are done with this customer, go to lunch".
- **In-App Messages** appear in the Notification Center in MAX. The message will stay in the Notification Center until the CSR deletes it or the message has expired. For example, if a supervisor needs to let their Title & Registration team know about a new T&R policy, they can send an in-app message through MAX that will appear in each CSR's Notification Center.
