

You are here: Cross Functional > Overrides/Escalation

Overrides/Escalation

When there are exceptions to business rules in MAX, a CSR will need to request an approval or override in order to proceed and complete a service.

- The CSR will receive an alert and will be prompted to initiate the approval request.
- The supervisor or manager can review, approve or deny the request via the Escalations Queue in MAX.
- The supervisor or manager also may also have the ability to escalate the issue to Technical Support for resolution (future enhancement).

When an Override is approved, the override is applicable only to that service.

- ▶ **Override Examples**
- ▶ **Account Overrides Chart**
- ▶ **Requesting an Override Within a Service**
- ▶ **Viewing My Escalations**
- ▶ **Responding to an Override (Supervisor)**
