

You are here: Documents and Scanning > Printing

Locate and Print Documents and Service Artifacts

If you need to print a service artifact for a service that has already been completed, you can do so from the Customer Record. The Customer Record retains electronic copies of payment receipts, temporary credentials, placards, permits, and more. There are two ways to locate service artifacts from the Customer Record:

- The Documents icon in the Navigation Bar.
- The Service History tab.

Before you can print anything, you will want to make sure you have your default printer set so all documents print to a specific printer. This should be done for you but if not contact your supervisor or the help desk to resolve.

- ▶ **Locate Service Artifacts using the Documents Icon in the Navigation Bar**
- ▶ **Locate Service Artifacts by Searching the Service History**
- ▶ **Download and Print Service Artifacts**
- ▶ **Missing Service Artifacts**
