

You are here: ASQ: Appointment Scheduling and Queueing > Appointment Scheduling and Queueing (ASQ) for Location Administrators

Appointment Scheduling and Queueing (ASQ) for Location Administrators

The ASQ options available to certain people at each MVD office location will allow them to make location specific changes to scheduling, if necessary.

For reference, here's a link to what CSRs experience when scheduling and managing appointments for customers: [Appointment Scheduling and Queueing \(ASQ\) for CSRs](#)

There are three main components to ASQ for Location Administrators:

- **Reports** - a number of reports available for the location
- **Users** - the ability to manage users who will have access to ASQ, such as Scheduling Role and Queuing Roles
- **Locations** - the ability to manage open hours, schedules, schedule overrides, and location queues

See each section below for details.

- ▶ **Reports**
- ▶ **Queue Dashboard**

Managing Users

The only users that may be added to ASQ have already been set up in MAX with an @mvm.azdot.gov username. When they are added, they are assigned one or more security roles:

- Location Admin
- Scheduling Staff
- Queueing Location Supervisor (Scheduling Role required for this role, and one or more Locations must be selected)
- Queueing Staff (Scheduling Role required for this role, and one or more Locations must be selected)

- ▶ **Searching Users**
- ▶ **Adding Users**
- ▶ **Editing Existing Users**
- ▶ **Inactivating Users**

- ▶ **Reactivating Users**
- ▶ **Hidden Users**
- ▶ **Locations**
- ▶ **Modifying Closed Days**
