Adding a Customer (Individual or Organization)

An official MVD Customer Record is required for any person or organization seeking services with MVD. If a customer does not already have a Customer Record, you will need to add a Customer (Individual or Organization) in MAX.

To avoid creating a duplicate record, be sure to execute at least two searches for the customer prior to adding them as a new customer.

If using Quick Search, do not use hyphens or dashes when searching for SSNs, EINs, or DOBs. Special characters can be used for names, just not unique identifiers such as SSN.

If adding a Trust, see [Adding a Trust](#) for detailed steps.

1. When no results are found, or the customer is not found in the Search results, *click* **Add New Customer**.

Advanced Search

Customer Plates Placard Permit VIN Title

Customer Type
Individual
