Agent and Customer

In MAX the person who pays for a service is called an **Agent**. There are some important things to understand about the role of an Agent:

- An Agent is the person who is actually paying, and accepting financial responsibility, for the MVD service.
- In most cases, the Customer of a MAX service is also the Agent.
- Separating the Agent and the Customer roles in MAX allows the system to apply any potential fees or penalties to the correct record if there is a problem processing the payment.
- Separating the Agent and the Customer roles also allows for improved verification of vehicle transfer claims.
- The Dashboard will display the Agent and the Customer names for services in progress or queued.
