

You are here: Customer > Characteristics

Characteristics

Characteristics are associated to a qualified customer and indicate and control things such as:

- Eligibility for a special plate
- Eligibility for a fee exemption (view [Fee Exemptions](#) for more information)
- Printing a designation on their credential (i.e. emancipated minor or Veteran)
- A need to have their customer record redacted (i.e. Address Confidentiality Program Characteristics)

When a fee exemption is to be used during a service, the Characteristic does not have to be entered prior to the service. By adding the exemption, the Characteristic will automatically be added after the service is completed.

Characteristics are added either through the customer record or through a service where the characteristic needs to be utilized.

Some characteristics are restricted as to who can add, edit and remove the characteristic from the customer record. Please check the [Characteristics](#) (below) for details.

Characteristics for Organization Customers may also control some of the things listed above, but generally are used to control access to interfaces and AZ MVD Now where they have unique services available based on the characteristic. For example:

- An organization with a Dealer characteristic will be able to access the Dealer Suite of Services
- Professional Driving Schools will be able to update Test Results via AZ MVD Now with the appropriate characteristic applied to the Organization Record
