Financial Receipt History

The Financial Receipt History (also call Account Service History) is a collection of Payment Receipts that impact a Customer's Account.

Because Authorized Third Party (ATP) offices are always the Agent for every service, their ATP Customer Account will include every Payment Receipt processed by that Third Party, whether it impacts the balance of the Customer Account or not.

The Financial Receipt History will display the following information:

- **Receipt Number:** Click to download a PDF of the Receipt
- **Business Transaction Number:** Also known as the Service ID on a Payment Receipt
- **Service Date:** The date the service was completed
- **Business Unit:** The location where the service was completed. If the customer completed a service through AZ MVD Now, that will display here
- **Customer:** The Customer receiving the benefit of the service
- **Service:** The name of the Service in MAX that was completed for the customer
- **Amount:** The total dollar amount for the associated service. This amount may or may not impact the Account Balance
- **Balance:** The running Account Balance. This figure will raise or lower if the service resulted in a debit or a credit to the account
