Credential Questionnaire

The [Credential Issuance](#) Questionnaire is a tab that lists a series of questions and affirmations for which you will capture the applicant's responses. This is a dynamic-content tab. MAX automatically prompts you to capture responses to appropriate questions based on several factors, including the applicant's age, medical history already captured in MAX, and the type(s) of credential(s) the customer is applying for. Because the Questionnaire tab dynamically generates questions based on multiple factors, the questions asked by MAX may not be the same from customer to customer or even from service to service for the same customer. For example, a customer with a class D driver license will be prompted to answer different or additional questions if they later apply for a Class A, B, or C commercial driver license.

Find examples below of many of the questions you may be prompted to capture responses for. For some questions you are merely capturing their response. For others, the responses you capture will automatically trigger additional steps you need to take before you can issue the credential (e.g. answer additional questions, or satisfy additional requirements).
