Identity and Eligibility Verification Interfaces

THIS TOPIC IS BEING UPDATED - NOT ALL EXAMPLES AVAILABLE

MAX automatically attempts to run electronic checks against national databases such as PDPS, SPEX, USPVS, and SSOLV, etc. to verify eligibility to obtain a credential or to verify identity.

All needed electronic checks are available during the credential issuance service. There is one exception when you will do an **AAMVA Helpdesk - Driver** service to complete an electronic check outside of a credential service - SPEXS for OOS credential when customer doesn't have their out of state credential with them.

VLS is currently not turned on, however it will be in the near future.

Max still requires a SAVE document to be added in order to satisfy the VLS requirement.

The following is a list of automatic verifications and what they do:

Verification Service	Integrated into MAX (Yes/No)	What this Service Does	What a CSR Should Know	What Triggers the Verification Service?
PDPS (Problem Driver Pointer System)	Yes	Checks if the customer has any problem pointers that would prevent issuance	If the requirement is not satisfied then will either have to put service on hold or waive.	Most Credential services (exception is standard ID.) A positive response is good until the end of day. So if they come back in on another day it will be run again.
VLS (Verification of Legal Status)	Yes	A new integrated web service version of SAVE, this will verify non-US citizen's authorized presence.	VLS is currently not turned on, however it will be in the near future. Max still requires a SAVE document to be added in order to satisfy the VLS requirement.	For any credential issuance service where the authorized presences is Temp INS or Resident / Permanent Alien.
SAVE (Systematic Alien Verification for Entitlements)	No	Verifies a non-US Citizen's authorized presence in the US <u>When to Use SAVE (Video)</u>	Once the non-citizen's authorized presence documents have been verified through SAVE, the CSR will manually waive the Verification of Legal Status (VLS) requirement in MAX, for more information on SAVE visit: <u>https://www.uscis.gov/save/about-save/save-verification-process</u>	On demand when a CSR goes to <u>SAVE website</u> .

USPVS (US Passport Verification System)	Yes	If a US Passport is entered as an Identification, this service will validate the US Passport.	If the requirement is not satisfied then you will either have to put service on hold or waive.	When a US Passport has been added to customer Identifications and has not yet been verified. Once verified this will not run again unless/until the US Passport is updated.
SPEXS (State Pointer Exchange Services)	Yes	Verify if a credential applicant holds a credential in another participating US State	If the requirement is not satisfied then will either have to put service on hold or waive.	All Credential services. A positive response is good until the end of day. So if they come back in on another day it will be run again.
CDLIS (Commercial Driver License Information System)	Yes	Verifies only one commercial driver license and one record for each driver and to check whether a driver is withdrawn.		There are several issuance and driver record events that may trigger this to run.

SSOLV (Social Security Online Verification)	Yes	Verifies Social Security Numbers.	When the SSOLV system is down, the customer will have to return at a later date to complete the licensing process.	When a Social Security Number has been added to customer Identifications and has not yet been verified. Once verified this will not run again unless a customer's legal name changes.
STA/Hazmat	No (not in phase I)	Checks to see if a customer wishing to obtain a Hazmat endorsement on their CDL has a current HME Security Threat Assessment (STA).		Request or expiration of a Hazmat endorsement on a CDL.
DACH (Drug and Alcohol Clearinghouse)	Yes	Verifies that CDL drivers are eligible with the Drug and Alcohol Clearinghouse	If a query returns a status of Prohibited, the credential will NOT be issued or escalated	CLP or CDL being issued, transferred, upgraded, or renewed

NRII (National Registry of Medical Examiners)	Yes	Verifies and pulls data for a medical examination report from an approved medical professional that is registered through the national registry	The inquiry could return up to 15 MEC matches that will trigger an exception review by MVD Support Services to determine which match, if any, should be recorded to the customer's record. If there are no matching MECs at the national registry, the NRII requirement will satisfy but the Medical Exam Certificate requirement will not.	Any issuance for CLP or CDL where there is not a qualified MEC on the record or there is an expired MEC on record
