Knowledge Testing in MAX

Knowledge testing (all test types) is now available directly in MAX and no longer Idemia's AutoTest software.

The basic flow of this process is:

1. Start the credential issuance service, collect fees and complete everything you would normally complete up to the Knowledge Test.
2. In the Requirements tab send the Knowledge Test to the test station (or print a paper test).
3. Go to the customer's record and add an Assisted Self-Service Invite (ASI) and print out the invite code and PIN to give to the customer.
4. In the test area, the customer will log into AZ MVD Now as a Guest, using the ASI you provided them.
5. The test will be the only option available for them to take from the testing computers.
6. The test will automatically stop when the tester has hit the threshold to either pass or fail the test.
7. Test will have the option to see results and review test answers.
8. Once the test is completed the results will be automatically updated in MAX.

Offered Languages for the Knowledge Test

- English
- Arabic
- French
- German
- Italian
- Korean
- Mandarin
- Russian
- Spanish
- Tagalog
- Vietnamese

Important Details:

- The customer can only take the test at MVD or ATP test computers. The ASI will not work on any other device
 - *Permit Test at Home* is the only exception, and it is also now using the new test format in MAX
- AZ MVD Now will automatically log out after 10 minutes of inactivity on the testing system. Make sure the customer knows this

CSRs are responsible for monitoring the testing area. This is done by visually scanning the testing area periodically.

If a customer is observed using inappropriate assistance, the CSR will politely and privately terminate the testing and inform the customer they were using inappropriate assistance in completing the test.

Inform the applicant they are eligible to retest the following business day.

For CDL Knowledge Tests ONLY: View the [Commercial Knowledge Test topic > Applicant is Observed Cheating](#) section on how to handle.

View the [Non Commercial Operator Knowledge Test topic > Verbal Knowledge Testing](#) section for more information on how to handle a customer who requests a verbal knowledge test.

Manually Updating Test Results

Knowledge Test results can be manually entered into MAX by using the Knowledge Only Test service, or when satisfying the requirements during a Credential Issuance service.
