Photo Management & Verification of Signatures

MAX requires a new photo be taken for any credential service. MAX will restrict your ability to complete a credential service until a new photo is in place.

The Photo First Photo is valid for one day, expiring at midnight the day it was taken.

If credential is issued, then endorsements are added that same day, you will receive the message, *"Photo First Photo is still Valid, no photo required."* You can continue without taking a new photo.

If the service is deleted, the photo will not be valid and will need to be retaken.

A new photo will need to be taken if any correction is done on the same day, due to new facial recognition process.
