

You are here: Driver & Event Management > Credential Issuance > Reactivate Credential

Reactivate Credential

When an active credential is canceled in error this is the process to follow to have it reactivated. If the credential status is not active due to an open withdrawal or because it is expired, it cannot be reactivated.

- All MVD field offices/ATP's that cancel a customer's Driver License in error can now reach out to Tech Support (602) 712-4900 to request the re-activation of that credential.
- The CSR will have to provide a brief description of how the credential was canceled in error to the Tech Support agent.
- As long as the credential is not expired, Tech Support will move forward with reactivating the canceled credential.

If the credential was canceled erroneously by an out of state jurisdiction, the CSR will also reach out to Tech Support to research the out of state issuance.
