Process Travel ID (TID) Started On AZ MVD Now

These instructions are designed for the CSRs who will be finishing the TID issuance for customer's who have started the process on AZ MVD Now.

Eligible customers can process their upgrade to an Arizona Travel ID (TID) in their AZ MVD Now account.

What makes a customer eligible:

- Photo on record is less than 8 years old
- Customer currently holds a non-commercial or commercial credential without HazMat
- The Primary document that is uploaded by the customer will need to be something we have seen before and we have in our systems (OnBase, MAX, etc.)
 - **Exception:** Primary document may be something we have not seen before if it can be verified electronically (e.g., document can be verified through SAVE or USPVS)
- Customer adds funds to the account
- The requirements are the same to process a TID. We need to see primary document, SSN, and proof of address

We will not do initial name changes during this process. We can keep names if they can provide name change document or use permissible documents. (Example: Customer uploaded birth certificate with maiden name, but we already have the name changed and documents to support the name change in MAX or OnBase. The name will be retained even though Primary provided shows maiden name.)

The customer is required to upload the front and back of an authorized presence card if the document number is not found on the front of the card, see [Foreign Authorized Presence](#) topic for card number locations.
