

You are here: [Driver & Event Management](#) > [Event Management](#) > [Adding an Incident](#)

Adding an Incident

This is the standard process on how to add an incident on a customer's record in MAX. If the violation is a DUI, follow your office standard work to contact technical support. CSRs should NEVER add DUI incidents to driver records.

Steps for Adding a New Incident to a Customer Record

1. Open MAX, click on the **menu**.
2. Open the **Driver Record**.

3. Type **customer's first name, middle initial (if applicable), last name, and year of birth**. Click **Search**.

It is recommend that you search by the customer's first, middle initial (if applicable), and last name so any duplicate customer records can be found and a [Combine Records Request, form #96-0698](#) can be submitted.

View the [Finding a Customer](#) topic > [Combine Records Requests](#) section for more information.
