Compliance Management

Compliance Management is part of the larger topic of [Event Management](#). When a customer experiences a withdrawal (stop, cancellation, suspension, revocation, or disqualification on their driver's privileges or on their vehicle's status), they will need to satisfy compliance requirements to reinstate or conduct MVD services. When an [incident is recorded](#), MAX automatically evaluates the Incident and, based on business rules, adds any appropriate [withdrawals](#) and compliance.

Compliance refers to the actions a customer must take to satisfy requirements to remove a withdrawal, such as paying a fee, providing documentation, waiting a period of time, or attending traffic school, etc.

Almost without exception, when a customer and/or vehicle has a withdrawal(s), you will only need to satisfy the Compliance. Once all Compliance is satisfied, MAX will automatically update the Withdrawal status and make the customer eligible for reinstatement or remove any stops.
