

You are here: Driver & Event Management > Event Management > Credential History

Credential History

Credential History houses the history of out-of-state and Arizona credentials a customer has been issued. When entering a credential from out-of-state, the prior credential may be canceled by the state of issuance. The nationwide system does not recognize a distinction between what type of credential was issued Arizona, just that a credential has been issued.

Credential History is also available from the customer's Driver Record (Credential History Tab). The functionality works the same whether you access it from the Customer Record or the Driver Record.

- ▶ **Search for and View Credential History**
- ▶ **Add Credential**

Editing Credential History

If out-of-state credential history was entered incorrectly, have an upline approver submit a Service Portal ticket.
