Disposition Codes & Incident/Withdrawal Statuses

Disposition Codes are what the courts send with convictions/dismissals to indicate the courts' status on the conviction. These are most often sent to MAX electronically through a batch job, but on occasion may be provided to MVD as a Court Paper Abstract that can be manually added/updated in MAX.

Disposition Codes are only updated in the Incident and will automatically update the Withdrawal status if impacted. For example, if the court voids a conviction, the Disposition Code for the Incident will be changed to 00 (Void.) This will automatically change the status of the Incident and Withdrawal to "Voided."

Statuses are how MAX indicates the status of an Incident/Withdrawal on the Driver Record. These are found and are most often managed in the Incident. In most cases, an update in a Disposition Code (in the Incident) will automatically update the MAX status, but on occasion must be changed manually.
