Event History

The Event History will allow Driver Improvement, Interlock Unit, Record Unit, Special Projects IT, MVD Support Services, and Tech Support to view the history of changes made to an Incident, Withdrawal, or Compliance. The data that displays for an incident or withdrawal will vary depending on the incident type.

There are 2 ways to access the Event History:

- Through the Driver Record Service at the bottom of the Driving History page
- In the MAX main menu under Management, the Event History will be found in the Event Management menu options

How to Use the Event History

1. Select an **Incident** or **Withdrawal**. If you select an incident then MAX will open the Incident History tab on the next page. If you select a withdrawal MAX will open the Withdrawal History tab on the next page.
