Interlock Reinstatement and Issuance

For a customer with a DUI suspension that requires an ignition interlock device to reinstate and issue a new credential with the interlock restriction there are two key steps:

1. To reinstate all compliance related the DUI Incident/Withdrawal EXCEPT the IID Installation requirement must be satisfied. Compliance you should satisfy may include Suspension Reinstatement Fees, Alcohol Screening/ Education, SR22, etc. Do NOT satisfy the IID Installation requirement.
2. Once all Compliance is satisfied, overnight, if the installer has transmitted the IID install data, MAX will build the IID monitoring line in Compliance Monitoring which will automatically satisfy the IID Installation Compliance requirement.

Once all compliance requirements are satisfied, the customer will no longer show suspended and you will be able to issue their restricted credential.

▶ **Reinstating a Customer with a DUI Withdrawal**

▶ **Issuing the Credential With IID**
