Withdrawal Types and Descriptions

Suspensions

The Division shall suspend a person's driving privilege after receiving notice of a conviction of the person in another jurisdiction and, determining that the conviction was for an offense that if committed in Arizona would be grounds for suspension. The suspension of a person's driving privilege does not affect any pending actions against the person (e.g., cancellation, other types of suspension, traffic survival school assignment, certified ignition interlock restriction, revocation, etc.). The expiration of a person's license during the suspension period does not invalidate or terminate the suspension.

A person whose driving privilege is suspended shall not operate a motor vehicle in Arizona under a license, permit or registration certificate issued by another jurisdiction, or otherwise during or after the suspension until the person has reinstated their driving privilege. Likewise, a person whose driving privilege is suspended under a license, permit or registration issued by another jurisdiction shall not operate a motor vehicle in Arizona during or after the suspension until the person has met all applicable requirements in the other jurisdiction.

When it is determined that a person's driving privilege must be suspended, a Corrective Action Notice, form #26-9611 will be sent to any address known to the Division. Accordingly, the Division may issue a temporary identification licenses (ID) to a person whose driving privilege is suspended.

Prior to voiding any suspension, the CSR must obtain approval from the Technical Support Unit.

Service of the Corrective Action Notice is considered complete upon the mailing of the notice. The Division is not required to prove actual receipt of the notice or actual knowledge of the suspension action.
