Withdrawal Occurring During a Service

Withdrawal Management is part of the larger topic of **Event Management**. A withdrawal is any stop, cancellation, suspension, revocation, or disqualification on a driver's privileges or on a vehicle's status. Whenever an **incident is recorded** into the system, MAX automatically evaluates the occurrence and, based on associated business rules, determines whether a withdrawal should be applied.

In some instances the incident, and its resulting withdrawal, occur as part of providing a service.

Credential Issuance Services Examples

- **Failed Vision Screening:** If the customer fails an in-office vision screening, the Vision Screening requirement, when you click the action icon, MAX will not allow you to satisfy the requirement by selecting Vision Screening in the Source field. The customer will need to visit an optometrist and return to the MVD with a completed Vision Exam Report.
- **Failed Knowledge Test:** The requirement remains unsatisfied and you will not be able to process and finalize the service until the customer is able to successfully pass the knowledge test.
- **Failed Skills Test:** The requirement remains unsatisfied and you will not be able to process and finalize the service until the customer is able to successfully pass the skill test.
- **Answering Yes to Military Question on Questionnaire Tab:** If this has not already been satisfied, answering yes to this question will trigger a new requirement on the Requirements tab. Ensure the customer has a Veteran or Military Personnel characteristic on their customer record and *satisfy* the "**Proof of Veteran Status**" document requirement on the Requirements tab.
- **Answering Yes to Medical Capabilities Questions on Questionnaire Tab:** Answering yes to any of these questions could trigger a Medical Review withdrawal or may trigger an additional Medical Exam or Vision Exam Certificate from a medical professional.
 - **Vision** - Answering yes and adding any of these conditions will trigger a Vision Exam Certificate requirement.
 - Monocular Vision
 - Glaucoma
 - Cataracts
 - Diabetic Retinopathy
 - Nystagmus
 - Color Blind

- ☐ Poor Night Vision
- ☐ Biopic Telescopic Lens System
- ☒ **Medical** - Answering yes and adding any of these conditions will trigger a Medical Exam Report (MER) requirement and/or a Medical Professional Statement on the Requirements tab. Some conditions may also trigger an MVD Med Review withdrawal. Med Review has its own Business Unit (BU) Queue and can review and evaluate Medical Exam Reports and Medical Professional Statements, but this may not be instantaneous.
 - ☐ Epilepsy
 - ☐ Parkinson's Disease
 - ☐ Narcolepsy
 - ☐ Alzheimer's
 - ☐ Bipolar
 - ☐ Cardiac Issue
 - ☐ Cognitive Issues
 - ☐ Chronic Obstructive Pulmonary Disease (COPD)
 - ☐ Dementia
 - ☐ Diabetic Event
