

You are here: Customer > Reported Deceased

Reported Deceased

If a customer applies for any type of credential issuance or vehicle service and a response returns with 'Deceased' or 'Reported Deceased' the CSR will**:

1. Ask the customer if they have any documentation on the official letterhead from the Social Security Administration (SSA) or Vital Records that is dated within 30 days. If the customer was not born in AZ they will need to contact vital records of the state they were born in.
2. If the customer does not have any documentation, provide the customer with the [Reported Deceased in Error, form #96-1003](#). This form provides the customer with the phone numbers and websites for both the Social Security Administration and Arizona Vital Records, and gives detailed information on what the Division requires to remove the "Deceased" status from their record.

Social Security Administration
(800) 772-1213

Arizona Vital Records
(602) 364-1300

3. The customer will reach out to one or both agencies to request a letter stating the deceased status was reported on their record in error.
4. The customer will return with this document as quickly as possible and provide it to a CSR.
5. The CSR will contact Tech Support (602-712-4900) and either upload to the customer documents or scan a copy to the agent assisting.
6. Tech Support will review the documentation and if everything is validated will remove the Deceased status on the Customer's Record.
7. The CSR should try to complete the Service while on the phone with Tech Support. If unsuccessful, have an upline approver submit a [Service Portal](#) ticket to get it resolved so they can complete issuance.

**If there is any suspicion of fraud, please see [Fraudulent Documents or Identity](#) > Deceased or Reported Deceased section on how to involve OIG.
