Accommodative Data and Mobile Home Snapshot

If there is no record for the Mobile Home in MAX and you need to add the Mobile Home Record from TPX, you will use the Accommodative Data Search in MAX. The Accommodative Database is a resource that has legacy information from TPX, that allows the ability to search for a Mobile Home Snapshot.

Once the mobile home information is gathered, it is time to recreate the mobile home record, see [Title and Reg Recreate](#) topic for the complete process of recreating a record in MAX.
