

Dangerous Action or Accident During Road Test

If a dangerous action or accident happens during a road test, follow the appropriate below steps to handle the situation.

- View the [Road Test Overview](#) topic > Causes for Disqualification or Automatic Failure section for examples of dangerous actions

- ▶ **CSR Duties during Road Test: Dangerous Action**
- ▶ **CSR Duties during Accident: Injuries or Property Damage**
- ▶ **CSR Duties after Accident: Back at the Office**
- ▶ **Supervisor Duties after Accident: Employee is Injured**

Additional Information

- If the CSR is the only witness to the accident:
 - Statements made by the CSR will be limited only to factual information and observation
 - Statements that establish blame are not voiced
- If there is an accident where there are no injuries and minor damage, it is up to the vehicle operator if they want to call the local police or exchange insurance information
- If the local police are called by one of the vehicle's operators and they do not respond, MVD does not have to take any further action (e.g., Incident reports, etc.)
- If local police are called, try to at least obtain a policy report number to include in the [MVD Incident Report, form #46-4411](#) being sent to Risk Management
 - If the report number cannot be obtained, Risk Management can contact the police department if they need a copy of the report
