

MAX Known Issues

Keyword(s)	Issue / Error	Description	What You Should Do
ARO/SPI	Adding OOS Title to ARO/SPI	When adding a an OOS title to an ARO/SPI, CSR receives 'Error - Title Out of Jurisdiction Date Cannot Be Greater Than Ownership Date.'	Temporary Work Around: Look the vehicle up in AAMVA - Vehicle Helpdesk (NM14) and use the last Title Issue Date that is BEFORE the ARO ownership date as the title issue date in the service. The permanent fix should be in MAX by March 30th.
Credential Requirements	Vision Exam Report	MAX is requiring all Visual Fields to be completed before CSR can save the Vision Exam Report results.	Enter 0 in each empty field to activate the Save button.
Credential Requirements	Unable to Save OOS Credential from Guam	When adding a Guam DL on the Credential tab, must select the correct Country and State.	Add the Guam license to the credential tab and if the dates are correct/current it will auto satisfy the test requirements. You must make sure when adding it to the credential tab the country must be United States and the state is Guam (GU).
Credential Requirements	Limited term credential (ie Foreign)- Vision Requirement and No application fee	When doing a limited term credential (i.e. Foreign) the Vision Requirement is added when it shouldn't be. It's also not adding fees for the credential service.	Waive the vision requirement and add the Limited Term fee for \$10 in taxes and fees screen.
Credential Requirements	Test Examiner dropdowns	In MAX, the Select Examiner dropdown does not include any of my Examiners.	A change has been requested. In the meantime, just select anyone from the list.

Credential Restrictions	Unable to add B restriction	Especially when an Out of State (OOS) DL is presented with a restriction, MAX isn't allowing the restriction to be added on the Requirements tab, even after adding the OOS credential on the Credential tab.	Temporary Workaround: 1. Add the OOS Credential on the Credential tab, with the Corrective Lenses Restriction. 2. On the Requirements tab, click Add Restriction to manually add the Vision Requirement. 3. Edit the Vision requirement, select Vision Screening, select Pass, and indicate Corrective Lenses restriction here! 4. On the Requirements tab click Add Restriction to add the restriction to the credential. Note: If you didn't add the Restriction in the Vision screening, you won't be able to add it here and will need to submit a MAX Support Form to have Level 2 help you fix it.
Credential Restrictions	Issuing Credential to Remove Restriction	When reinstating a driver who was eligible for a restricted in the past, MAX is still issuing a restricted license when the driver should be issued a full non-restricted credential.	Temporary workaround: The first issuance service after completing a 'Compliance fee' service may give the driver a restricted credential, if it does and you can verify the driver should NOT be restricted, a second issuance (no fee) service should be done and that will produce a full non-restricted credential. If you restart a Credential Issuance Service from WIP, you may need to delete and restart the service to remove the Restriction.

Credential Restrictions	M Endorsement with 3-wheel restriction + TID	MAX is not allowing an M Endorsement with 3-wheel restriction and Travel ID.	CSR needs to complete two different services, allowing the first to finalize before adding the second: 1. To issue the TID. 2. To issue the Credential adding the M Endorsement and 3-wheel Restriction (Do NOT click Class D or Travel on this one - only click the endorsement you are adding).
Customer Account	Customer Account is required	After clicking Pay Now within a service and moving to the checkout screen, MAX provides an error that the "Customer Account is required". This means that the customer (agent) in the service (on the right panel of the checkout screen) is not a Level 3 customer. In other words, they are missing at least one of the 4 requirements for a customer account.	Review Customer Account Requirements in MVD One Source and review the Customer Record to ensure all 4 requirements have been met (3 requirements for Organizations).
Customer Record	Customer Name Change	When doing a customer name change, if the customer is over 18, MAX is not asking for the Name Change Documentation.	CSRs need to be aware of this issue and continue to upload the Name Change documentation even if not being prompted for it.

Customer Record	Duplicate Customer Records	Two records exists for the same customer: 1. One record is a Level 3 record with an SSN and AZ MVD Now access. 2. The other record is an old 'pseudo' record that displays the customer's vehicles.	At this time, you must follow the process for combining records. In the meantime, you can do the following to ensure all payment receipts for services are visible to the Level 3 customer with AZ MVD Now access: 1. Ask questions to validate both customer records - Don't provide confidential information to the customer over the phone. 2. Ensure that the record with the SSN is a Level 3 customer - if not, make that record a Level 3 customer. 3. Complete a TR Corrections Service, then submit a Combine Records Request and complete the original service as normal.
Customer Record - Address	Updating a customer record from an Out of Country address to a US Address	When updating an address on a customer record, and the prior address is from a country other than the US, there is a bug where you may get an error if you update the address fields in the wrong order.	Until this is fixed, to avoid this error, enter United States as the country FIRST, then update the state and county fields.
Fees	Re-Application Fee not populating for Credentials	Reapplication fee: MAX is not collecting the \$25 reapplication fee Its collecting \$12. The reason is that after collecting the suspension fee the customer no longer shows suspended and the system collects for a dup DL.	The fees can be manually adjusted to \$25 - click Add Fee on the Taxes and Fees screen in the Credential Issuance service. If a CSR forgets to manually adjust the fee, we will take the loss - we will not call the customer back in or ask them to pay after the fact. It may still be a QA finding, though.
ID	First time IDs for customers with Abandoned Vehicles (ABV)	Abandoned Vehicle incidents are creating withdrawals for both T&R and Drivers services. When issuing a first-time ID for a customer with an ABV incident, MAX is stopping the service based on the withdrawal.	CSR should request the override in the Credential Issuance Service (ID) in order to continue with the Service.

Keyword(s)	Issue / Error	Description	What You Should Do
OHV Fees	MAX is not adding the \$3.00 VLT	When processing a Title and Registration service OR an Update Registration/Renewal Registration for a primarily Off Road vehicle. MAX is not collecting the reduced VLT of \$3.00	1. Complete the OHV Decal Application (if applicable) 2. From the Taxes and Fees screen select: Add Fee 3. Add the REDUCED VLT \$3.00 4. Registration Renewal should be \$5.08 + decal Title and Registration should be \$34.10
OHV Renewals	OHV Renewal on certain Off-Road Vehicles	Several OHV fixes were completed but there is still an issue with renewing or replacing a decal when it is off road. This is happening because Primarily Off-Road, Primarily On-Road and Off Road must have a vehicle type of ATC or ATV.	Until this is fixed: 1. Do a TnR Corrections service and update the Vehicle Type Motorcycle to All Terrain Vehicle or All Terrain Cycle. 2. Do an Update Registration service to renew or replace the OHV Decal. 3. If there is no lien on the vehicle you will also need to do a Print Title service since the TnR Corrections service issues a new title.
PDPS	ELG PDPS Requirement Not Satisfying	When processing a Credential Issuance service and PDPS does not automatically satisfy, you must click the Edit pencil and Request PDPS Inquiry. If the customer verifies they are the same person from the response and the Status shows Eligible, the Requirement is still not satisfying.	Only if the customer is verified AND the Status shows eligible, you may waive the PDPS requirement until this bug is fixed. Waive the PDPS Requirement with Reason: Document, and type the following in the Comments: "PDPS ELG: MAX not receiving results" See instructions here. You do NOT need to submit a Level 2 support form or contact Tech Support.

Permanent Commercial Trailers - New	MAX Is collecting fees for a used trailer	When a permanent trailer is being titled and registered for the first time in Arizona, MAX is not collecting the VLT fee.	1. From the Taxes and Fees screen click ADD FEE 2. Add PERMANENT TRAILER VLT \$555.00 3. Total should be \$805.52
Photos	Photo not transferring for Standalone Test	CSR trying to take a photo for a Standalone Test service, but the photo isn't transferring over.	Don't use a Standalone Service. Start a Credential Issuance service to take the photo and capture the Test Requirements / Results, then put the Service back in WIP.
Placards	Disability Placards for Non-Profit Organizations	When completing a Placard service, MAX requires either Medical Certification or Out of State - there is no other option in the dropdown	Choose Medical Certification and type any number in the Medical Certification Number field, until there is another option available (future enhancement)
Registration Credit	No Credit Available	Customers with credit available are showing as No Credit Available in MAX in the Request Registration Credit service.	Step One: Attempt Registration Credit Service for all customers who were owners on the vehicle to make sure the Registration Credit isn't available Step Two: Check customer(s) Account > Financial Receipt History to ensure they haven't already received the Registration Credit for the plate Step Three: If no credit is issued or available but should be, submit a MAX Support Form (money matters)
VLS	VLS won't verify	If Authorized Presence (VLS) in the requirements tab in Credential Issuance is not working and not automatically verifying foreign credentials..	The workaround is to log into SAVE and verify the foreign document(s). If they verify, you can waive the VLS requirement (use Document, with note of "verified in SAVE")
