(Permanent or Temporary)

Replace Disability Placard (Permanent or Temporary)

The Replace Disability Placard service provides the ability to replace an existing Permanent or Temporary Disability Placard for a customer without making any changes to the placard issue date or expiration date.

When the customer is in office, no forms are required to be completed for a replacement disability placard. There is no fee charged for a replacement or a reprint (while waiting for official placard in mail).

For mail-in replacement requests, a customer may use the [Disability- Deaf/Hard of Hearing Plate/Placard Application - Individual, form #96-0104](#) or [Organization Disability - Plate/Placard Application, form #96-0104B](#). A Medical Certification is not required for replacement placards.

The steps listed below will work for replacing either type of placard, as they function the same way in MAX.

1. From the Services menu, *select* **Replace Permanent Placard** or **Replace Temporary Placard**, depending on the type of placard you need to replace.
2. *Search* for the **Customer** related to this service.

3. Identify the Placard to replace under Placard Results and *click* the **Select** icon.

- If no placards are found, you cannot complete this service for the customer. Check the customer record to verify what, if any, placard can be replaced.
