

Fuel Types & Alternative Fuel Vehicles

Non-Alternative Fuel Types

- Diesel
- Electric Non-compliant*
- Gasoline
- Hybrid; includes all types of hybrid vehicles
- None; used for trailers or vehicles without a motor
- Alcohol

Hybrid is recognized as a valid fuel type in MAX and should not be changed from Hybrid to Gas when processing.

*If a golf cart has a Fuel Type of 'Electric non-compliant' they will receive a Alternative Fuel Motorcycle plate; however, they are not eligible for Alternative Fuel registration.

Alternative Fuel Types

Alternative fuels are defined as any fuel, other than gas or diesel, determined and certified by the Environmental Protection Agency (EPA).

- Natural gas
- Hydrogen
- Liquefied petroleum or a blend of hydrogen with liquefied petroleum or natural gas
- A blend of 70% alternative fuel and 30% petroleum based fuel
- Solar
- Electric
- Alcohol, vehicle must have been purchased prior to August 24, 1998
- Any other fuels as determined by the EPA that is not defined in A.R.S. § 1-215

Alternative Fuel Vehicles

Arizona Law requires a vehicle to be powered exclusively by one of the fuels listed in the [Alternative Fuel Types](#) section in order to receive an Alternative Fuel special plate and to be eligible for reduced Vehicle License Tax or Tier 1 & Tier 2 vehicles.

When transferring ownership and a customer does not select a plate, the Alternative Fuel plate will be the default plate for alternative fuel vehicles.

- ▶ **Required Documentation for Initial Transaction**
- ▶ **Required Documentation for Subsequent Title Transfers**
- ▶ **Emissions Requirements**
- ▶ **Alternative Fuel Vehicle Fees**

Title and Register in MAX

View the Title and Registration topic for more information on how to process an alternative fuel.

- ▶ **Alternative Fuel Vehicle(AFV) Sticker**
- ▶ **Replacing the AFV Sticker**
- ▶ **Converting an Alternative Fuel Vehicle**

Bi-Fuel Vehicles

Bi-fuel vehicles, which are vehicles that have the capability of using either an alternative or non-alternative fuel independently, are no longer issued AFV registration.

A truck equipped with an alternative fuel (propane) tank that also has the ability to run on gas is not eligible for an AFV registration.

Current owners of a bi-fuel vehicle with an Alternative Fuel special plate will be allowed to maintain their plate and pay a reduced Vehicle License Tax until they sell or transfer the vehicle. They will be allowed to transfer the Alternative Fuel special plate to a **qualifying AFV** (same owner and must provide proof) but will not be allowed to transfer it to another bi-fuel vehicle.

- ▶ **Emissions Requirements for a Bi-Fuel**

Energy Efficient Vehicles

Energy Efficient Plate (EEP) were given to qualifying plug-in hybrid electric vehicles. The program will be discontinued as of March 2, 2020; however, there will still be existing vehicles with the EEP.

Owners of these vehicles may keep the EEP, but are only eligible for replacement (lost, stolen, or destroyed) or requesting a disability symbol on the EEP. A duplicate (second) plate will **not** be allowed.

The EEP will need to be removed from the vehicle and issued a Passenger plate when the following happens:

- Another owner is added

- The vehicle is sold, dismantled, salvaged, or crushed
- Another qualifying plug-in hybrid electric vehicle is purchased; the plate is non-transferrable

Vehicles with the EEP are able to be driven in the High Occupancy Vehicle (HOV) lanes regardless of the number of passengers in the vehicle.

If the vehicle is sold and the owner request Registration Credit, a \$12 Registration Credit fee will still apply.

If a plate is issued for any of the following, [Postage and Handling Fees](#) will apply.

Lost or Stolen EEP

When an EEP is lost or stolen, an owner may apply for a replacement plate with the Division.

View the [Update Registration](#) topic > Updating Registration service to process this request.

Disability EEP

The owner of a plug-in hybrid electric vehicle may apply for an Energy Efficient Disability plate (EEDP) when qualified.

A [Disability - Deaf/Hard of Hearing Plate/Placard Application, form #96-0104](#) is required when there is not a Disability plate or placard on file for the owner.

View the [Update Registration](#) topic > Updating Registration service to process this request.

Standard EEP and wants a EEDP

A [Special Plate Application, form #96-0143](#) is required and a [Disability - Deaf/Hard of Hearing Plate/Placard Application, form #96-0104](#) is required when there is not a Disability plate or placard on file for the owner.

No fee will be charged to replace the standard EEP with a EEDP.
