

You are here: Title & Registration Services > Cancel and Re-Establish Registration

Cancel and Re-Establish Registration

DO NOT use this service until instructed to do so by a Supervisor or Level 2 MAX Support!

Scenario 1: You renew a registration and you realize you've renewed the wrong registration.

Scenario 2: You renew a registration for a customer and when completed they changed their mind about the registration term (example: they wanted a 1 year and you processed for 2 years).

Scenario 3: You renew a registration for a customer without applying the requested exemption.

Scenario 4: You renew a registration for a customer and you realized you forgot to remove the Penalty when they signed the penalty fee-waiver.

Scenario 5: You issue an Arizona Registration Only (ARO) and it was issued in error and/or the incorrect fees were charged.

For these scenarios you can easily cancel that registration, and it will re-establish back to the original registration and credit the fees to the account of the Customer (Agent) that paid them. You must follow this process to ensure it's canceled and re-established correctly. Once completed you can register the vehicle correctly.

If you complete any other services (such as Print Title, Issue Permit, Update Registration, etc.) after the incorrect service, then there will be no fees to credit to the customer (agent) who paid for the original service.

1. From the Services menu, **select Cancel Registration**.
 2. **Search** for the **Customer** and **Vehicle** related to this service. In this case you will **use the customer to whom you mistakenly transferred the registration**.
 3. **Select** the **registration** you want to cancel.

5. **Select Renewed in Error - Re-Establish** from the Cancel Registration Reason drop down (for **Scenario 1 to 4**). **IMPORTANT:** This option, when selected, is what will re-establish the prior registration and credit back the fees to the customer's account.

OR

Select ARO Entered in Error (for **Scenario 5**). This option is only available when processing on an ARO record.

6. Click **Confirm**.

This screenshot shows the 'Cancel Registration' form. At the top, there are tabs for 'Cancel Registration', 'Owners', 'Vehicle', and 'Documents'. The 'Confirm' button is highlighted with an orange circle and the number 6. Below the tabs, the 'Cancel Registration' section has a '+ Notes' button. The 'Cancel Registration Reason' dropdown menu is open, showing 'Renewed in Error - ReEst' as the selected option, which is also highlighted with an orange circle and the number 5. Below this, the 'Registration' section is visible.

This screenshot shows the 'Cancel Registration' form with the 'Cancel Registration Reason' dropdown menu open. The dropdown menu lists several options: 'Select...', 'Select...', 'ARO Entered in Error' (highlighted with an orange circle and the number 5), 'CSOT Request', 'Credit Requested', and 'Entered in Error'. The 'Confirm' button is also visible at the top right, highlighted with an orange circle and the number 6.

7. Review the information to ensure the accuracy of the information on how the registration will be re-established.

8. If everything looks correct, click **Continue**.

9. The Taxes and Fees screen will display with the fees paid that will be credited back to the account of the customer (agent) who paid it.

10. Click **Pay Now** after reviewing the fees to verify for accuracy.

If any other services (such as Update Registration, Print Title, Issue Permit, etc.) were completed after the incorrect Registration service, then there will be no fees to credit to the customer (agent) who paid for the original service.

14. You can now do the Renew Registration again for the customer.

If you selected Replace or Issue New Plate during the incorrect Registration Renewal, a plate will be queued up to print and be mailed to the customer. You will need to cancel that plate. Email the Special Plates Unit at specialplates2@azdot.gov that the new plate issued should be canceled. To find the plate number, go to your customer's documents and bring up the Temporary Plate document that was generated in the original service.
