

Commercial Vehicles

Cab and Chassis

A cab and chassis vehicle is made up of two parts:

- The frame of the vehicle (Chassis) **and**
- The covered compartment (in which the machinery is housed and the operator sits (Cab)

Typically, a cab and chassis vehicle is purchased with the intent of converting the vehicle by permanently installing equipment, either at the time of purchasing or a later date.

- Permanently installed equipment is defined as equipment which once installed, creates a definite interior or exterior change to the vehicle and is not easily removable
- Equipment that is permanently installed on a cab and chassis, whether at time of purchase or later, is subject to having the Factory List Price (FLP) increased as well as the Vehicle License Tax (VLT)

Title and Register in MAX

View the [Title and Registration](#) topic for more information on how to process a cab and chassis.

Commercial Vehicles

An owner of a vehicle that is requesting commercial registration for a vehicle or trailer or vehicle combination (a motor vehicle with a semi-trailer being pulled) is required to pay certain additional commercial fees plus all normal registration fees.

Vehicles that are required to have commercial registration are:

- Used for commercial purposes (in the name of a company or individual)
- Pickup trucks and vans that have a manufacturer's gross vehicle weight rating (GVWR) of one-ton or larger (even if the vehicle is being used for personal use)

▶ **Commercial Terms**

▶ **Titling and Registering a Commercial Vehicle**

▶ **Federal Heavy Vehicle Highway Use Tax (Form 2290)**

Farm Vehicles

A Farm vehicle is any vehicle being used on a farm for commercial farming or the raising of commercial stock. A Farm vehicle must meet all of the following requirements:

- Used for commercial farming or the commercial stock raising
- Controlled and operated by the owner or owner's family members or employees
- Used to transport agricultural products, machinery or supplies to or from a commercial farming or commercial stock raising
- Cannot be used in the operations of for hire motor carrier (means a person engaged in and compensated for the transportation of good or passengers)
- Is not exempt from registration

"Commercial Farming" is the intensive cultivation of arable land by raising agricultural or horticultural products as a principal source of the owner's livelihood. "Commercial stock raising" is breeding, raising and caring for domestic animals as a principal source of the owner's livelihood.

When the Farm vehicle is controlled and operated by the Farm vehicle's owner(s), the owner's family member(s), or employee(s) within 150 miles of the farm, the driver is exempt from the Commercial Driver License (CDL) requirement.

► Farm Vehicle Registration

Seasonal Agricultural Vehicles

Seasonal Agricultural Registration (SAR) is issued to a commercial vehicle(s) that is used solely for seasonal agricultural purposes. An agricultural vehicle is defined as a vehicle, trailer, or semi-trailer used in the production or transportation of crops, livestock, machinery, or supplies in farming operations.

The owner of an agricultural vehicle must request the SAR.

- SAR allows the owner to pay prorated commercial fees for a specific period of time; not less than 90 days and not more than a full year (3 to 11 months)
- Must declare the weight each time the vehicle is registered

► Rules of a SAR

► SAR and Vehicle Registration

Until we are fully paperless, when you finish the T & R service for the customer, you will print out the Title Summary (artifact), have the customer review and sign, and re-scan into MAX. This will replace the process where you print the T&R Application for the customer to sign.

Non-Government Emergency Vehicle Registration

An emergency vehicle that is solely used for firefighting or rescue service qualifies for a reduced VLT and is exempt from registration.

The following vehicles are eligible and will receive a Commercial Vehicle plate:

- An ambulance
- A firefighting vehicle
- A hearse or any other vehicle that is used by a mortician in the conduct of the mortician's business
- A motor vehicle or vehicle combination that is used for the transportation of passengers
- A trailer or semitrailer with a declared gross weight of 10,000 lbs. or more

A vehicle that is used for the transportation of department personnel (e.g., Fire Chief) for non-emergency purposes is not eligible for the tax exemption.

View the policy [8.10.5 Non-Government Emergency Vehicle Registration](#) for a list of non-eligible vehicles.

The owner of an emergency vehicle is liable for the full registration fee and a prorated VLT and commercial registration fee for each month the vehicle is used for purposes other than emergency services.

- The VLT will be prorated and is calculated on a basis of one-tenth (1/10) of the annual VLT due for each month the vehicle is so operated

View the [Fee Exemptions](#) topic > Vehicle Qualifier section for more information on fee exemptions for a non-government emergency vehicle.

When processing a Title and Registration service, in Registration section, select Non-Government Emergency Service from the Use Type drop-down menu.

Title and Register in MAX

View the [Title and Registration](#) topic for more information on how to process any of the above mentioned vehicle types.

Remember to issue a **Commercial** plate, as well as choosing the correct **Use Type** in the **Registration** section.
