

Grey Market Vehicles

A Grey Market vehicle is a vehicle that was not manufactured for the United States market and does not conform to Federal Motor Vehicle Safety Standards (FMVSS) and Environmental Protection Agency (EPA) requirements.

Indicators a Vehicle is a Grey Market Vehicle

The following are indicators of a possible Grey Market vehicle but do not necessarily mean the vehicle is a Grey Market vehicle:

- There is no manufacturer certification label or Registered Importer (RI) label of conformity indicating the vehicle meets FMVSS
- The VIN has less than 17 characters or the VIN does not conform to U.S. DOT identification requirements
 - The 17 character VIN has been in use since September 1980 and is required for all model year 1981 and newer vehicles
- The EPA sticker is missing or the EPA sticker was manufactured and affixed by a licensed converter
- A foreign country title or registration is submitted as proof of ownership
- The glass and lens covers (e.g., head lights, tail lights, windshields) are not approved by the U.S. DOT

View the policy [8.13.1 Grey Market \(Import\) Vehicle](#) for more information on requirements and documentation for Grey Market vehicles.

Grey Market or Not Grey Market, That is THE Question!

Still confused if the vehicle is or isn't a Grey Market vehicle?

First, you need to determine if it is indeed a Grey Market vehicle or not before you can proceed in requesting the proper documentation from your customer.

No, I'm NOT a Grey Market vehicle	Yes, I AM a Grey Market vehicle
Built to conform with U.S. FMVSS and EPA standards	Not built or modified to conform with U.S. FMVSS and EPA standards
Does not matter where the vehicle was built or where it is coming from	Does not matter where the vehicle was built or where it is coming from

What else can help me determine if it a Grey Market Vehicle?

Another (semi) quick way of determining if a vehicle is a Grey Market vehicle is a Level I Inspection to determine if the manufacturer certification label is there and that it states the vehicle conforms to U.S. standards. Yes, a Level II or III Inspection is required, but a Level I Inspection may help determine if the vehicle is truly a Grey Market vehicle and if those procedures or documents are required.

- If the conforming label is there, continue as a normal vehicle (even if there is a foreign ownership document)
 - View the [T and R Scenarios](#) topic > [Out-of-Country Vehicles](#) section for more information on how to process
- If the conforming label is NOT there, proceed as a possible Grey Market Vehicle and refer to Level II or III Inspection

Documentation for Grey Market Vehicles

- Ownership documentation
 - All documents must be written in English
 - Non-English documents must be accompanied by an original English translation performed by a qualified translator, view policy [8.2.1 General Title Information](#)**Section N** for more information on qualified translators
- Level I Inspection for:
 - Vehicles 25 years and older
 - Foreign military (NATO) personnel with vehicles approved for temporary use in the U.S.
- Level II or III Inspection for all other possible Grey Market vehicles

- Manufacturer documentation verifying the vehicle complies with FMVSS and EPA standards (only applies to vehicles manufactured for Canada
 - View the Vehicles Manufactured for Canada section

View the [Level I Basic ABV Inspection Training Manual](#) or [Reference Manual](#), or the [Vehicle Inspections](#) topic for more information on Level I Inspections.

Don't I need import documentation?

Import documentation is not required. The documentation, though, can help support their overall claim of ownership and build a foundation for proper documentation to get a title in Arizona.

If import documentation is provided, along with an ownership documentation, it is best practice to view it and compare it to the ownership documentation.

There are some instances where import documents are indeed required, such as NATO personnel or export only vehicles.

Vehicles Manufactured for Canada

The Division may issue a title to a vehicle manufactured according to Canadian specification if it meets all the following specifications:

- Is not for resale
- Has a GVWR of less than 10,000 lbs.
- Is a passenger vehicle, motorcycle, or SUV
- Manufacturer documentation verifying the vehicle complies with FMVSS and EPA standards
 - FMVSS (48 CFR 571) and EPA (40 CFR 86) labeling location requirements are waived
 - If manufacturer documentation indicates that a vehicle's speedometer or headlights do not comply with FMVSS and EPA standards, documentation verifying completion of a modification that brings the vehicle into compliance is required

North Atlantic Treaty Organization Agreement (NATO)

Foreign military (NATO) personnel may import their vehicles from out-of-country and the Division is authorized to provide Arizona Registration Only (ARO) for the vehicle, no title will be issued. View the [Arizona Registration Only \(ARO\)/ Special Interstate Registration \(SPI\)](#) for steps on processing the ARO.

Required Documentation

- Import documents
 - Box 12 needs to be marked to indicate vehicle will not be sold unless to another qualifying owner (typically NATO to NATO personnel)
- Level I Inspection
- Title and/or registration from out-of-country

- If vehicle is sold to another qualifying owner (typically NATO to NATO personnel), additional, properly completed bills of sale may be submitted
- Military orders
 - If vehicle is sold, military orders will need be submitted for current owners and for the current buyer to verify the transfer is authorized per Import documentation, Box 12
- Proper VLT exemption documentation, if applicable

Import Document, Box 12

The import document (Importation of Motor Vehicles and Motor Vehicle Equipment Subject to Federal Motor Vehicle Safety, Bumper and Theft Prevention Standard, form OMB No. 2127-0002) will require Box 12 to be marked to indicate they are foreign military members and that they will be complying with the rules listed in Box 12.

► Example of Import Document, Box 12
