

NMVTIS Responses

The National Motor Vehicle Title Information System (NMVTIS) is an online, interactive data exchange program that provides participating states with specific motor vehicle and title record information intended to reduce fraud and deter the titling of stolen vehicles.

NMVTIS deals with:

- Possible stolen vehicles; which includes the Possible Stolen Vehicle Report
- Out-of-state brands transferring to Arizona titles
- Verification of data entry of out-of-state title numbers during transfer to Arizona; which includes verifying if the out-of-state title number is the most current title number

Possible Stolen Vehicles

The NMVTIS Help Desk tracks and monitors every possible stolen vehicle hit. Therefore, every time a Possible Stolen Vehicle Report message populates, the report must be completed and not overlooked. This 'paper trail' is vital for the NMVTIS Help Desk to gather the statistical information for successful resolution.
