

Reconstructed and Specially Constructed Vehicles

The Division requires that every vehicle being titled and/or registered be identified by the name of the manufacturer, a brief description of the vehicle and the VIN. Additionally, for the purpose of obtaining a more complete description of the vehicle, the applicant is required to indicate whether the vehicle is reconstructed or specially constructed.

Reconstructed Vehicles

A reconstructed vehicle is defined as any vehicle which has been assembled or constructed largely by means of new or used essential parts from other vehicles. A change to any of the essential parts may require a vehicle to be classified as a reconstructed vehicle.

- ▶ **Essential Parts**
- ▶ **Documentation Required for a Reconstructed Vehicle**
- ▶ **Inspections for Reconstructed Vehicles**
- ▶ **Reconstructed Brand Categories**

Specially Constructed Vehicles

There are four types of specially constructed vehicles:

- Dune Buggies
- Homemade trailers (view the [Homemade Trailers](#) topic for more information)
- Kit Vehicles (Glider Kits) or Trailers
- Sandrails

- ▶ **Dune Buggies**
- ▶ **Kit Vehicles and Trailers**
- ▶ **Sand Rails**

Until we are fully paperless, when you finish the T & R service for the customer, you will print out the Title Summary (artifact), have the customer review and sign, and re-scan into MAX. This will replace the process where you print the T&R Application for the customer to sign.
