

You are here: [Title & Registration Services](#) > [Off-Highway Vehicles](#) > [Recreational Vehicles](#)

Recreational Vehicles

Recreational vehicles can be titled and registered in Arizona for specific uses. The following vehicles are considered recreational and each have their own title and registration requirements.

- Golf Carts
- Mopeds
- Motor Driven Cycles and Scooters
- Neighborhood Electric Vehicles (NEVs)
- Quadricycles
- Off-Road/Off-Highway/Recreational Motor Vehicles

Golf Carts

The Division is authorized to register a golf cart for highway use. A golf cart is a motor vehicle that:

- Is primarily designed to carry four or fewer persons
- Is designed to be and is operated at speeds of 25 miles per hour or less
- Has at least four wheels in contact with the ground
- Has an unladen weight of 1800 lbs. or less

▶ Vehicle Requirements for a Golf Cart

Title and Register in MAX

View the [Title and Registration](#) topic for more information on how to process a golf cart.

Mopeds

A moped is a vehicle that meets the following criteria:

- Human powered, aided with a helper motor
- Engine must be no more than 50 cubic centimeters (cc)
- Maximum rated speed is 25 mph or less

A cycle (49 cc or above) that does not meet all of the above moped criteria, but is manufactured primarily for use on public streets, roads, and highways, will be considered a motor driven cycle and is subject to title and/or registration as a motorcycle.

View the [Unique Vehicle Guide](#) for more information on mopeds.

Title and Register in MAX

View the [Arizona Registration Only \(ARO\)/ Special Interstate Registration \(SPI\)](#) topic for more information on how to process a moped.

Motor Driven Cycles and Scooters

Certain types of motor scooters fall under the federal definition of a motor vehicle and are subject to the same Federal Motor Vehicle Safety Standards (FMVSS) administered by the United States Department of Transportation's (U.S D.O.T.) National Highway Traffic Safety Administration (NHTSA) that currently apply to motorcycles and motor driven cycles if they are:

- Of the same general body type as a motorcycle or motor driven cycle
- Manufactured primarily for use on public streets and roadways
- Manufactured to be operated at speeds above 20 miles per (MPH)

Motor scooters are further defined for the purpose of Arizona title, registration, and driver license requirements as a motor driven cycle, which means a motorcycle, including every motor scooter, with a motor that does not produce more than five horsepower.

Motor driven cycles and/or motor scooters are titled and registered by the Division only if **all** of the following federal and state safety and equipment requirements are met:

- Have a manufacturer assigned 17-digit VIN
- Have a Federal label certifying the vehicle conforms to all applicable U.S. Federal Motor Vehicle Safety Standards in effect on the indicated date of manufacture or all other official documentation required to ensure FMVSS compliance
- Have been manufactured primarily for use on public streets and roadways
- Have been originally manufactured to exceed 20 MPH

- Have an engine displacement of 49 cc or above
- Have a seat to be straddled by the operator and handlebars for steering control
- Have not more than three wheels in contact with the ground
- Have met all applicable safety and equipment requirements in A.R.S. Title 28, Chapter 3, Article 16
 - The vehicle owner is responsible for making sure the required equipment is in place
 - This is accomplished by the submitting a properly completed [Highway Use Certificate, form #96-0371](#), certifying the vehicle meets all applicable safety and equipment requirements for on-road use

CSRs will follow all current procedures on verification of VIN, body style, and import documentation as applicable.

Neighborhood Electric Vehicles (NEV)

A Neighborhood Electric Vehicle (NEV) is a self-propelled electric powered motor vehicle that must meet all of the following criteria:

- Is emission free
- Has at least four wheels in contacts with the ground
- Complies with low-speed vehicles set forth in the Federal Motor Vehicle Safety Standard 500 and 49 Code of Federal Regulations

Off-Road Vehicles

An off-road recreational motor vehicle is defined as a motor vehicle designed primarily for recreational non-highway all-terrain travel.

There are three types of off-road vehicles:

- Off-highway vehicle
- All-terrain vehicle
- Off-road recreational motor vehicle

Off-Highway Vehicle

An off-highway vehicle is defined as a motorized vehicle that is operated primarily off of highways and that is designed, modified or purpose built primarily for recreational non-highway all-terrain travel. An off-highway vehicle may be a (an):

- Utility vehicle
- All-terrain vehicle
- Motorcycle
- Four wheel drive vehicle
- Dune buggy
- Sand rail

All-Terrain Vehicle

An all-terrain vehicle is defined as a motor vehicle designed primarily for recreational non-highway all-terrain travel that travels on three or more non-highway tires.

Motorcycles, All-terrain Cycles (ATC), and All-Terrain Vehicles (ATV) are exempt from emission testing, view Policy [8.9.3 Emission Requirements](#) for more information.

Off-Road Recreational Motor Vehicle

An off-road recreational motor vehicle is defined as a motor vehicle designed, modified or purpose built primarily for recreational non-highway all-terrain travel and that is not operated on a public highway.

A motor vehicle used for construction, building, trade, mining, or agricultural purposes is NOT considered an off-road recreational motor vehicle.
