

You are here: [Title & Registration Services](#) > [TnR Fees & Credit](#) > [Registration Credit](#)

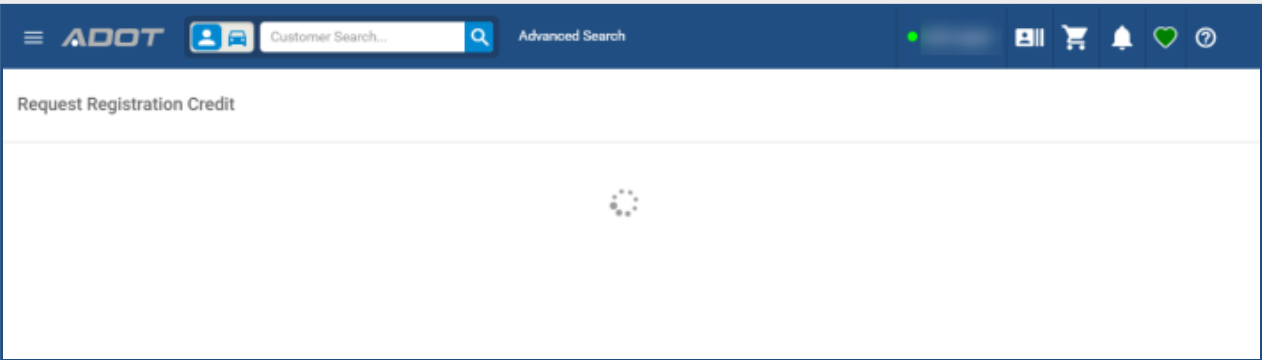

Registration Credit

When a owner sells a vehicle, the plate and its registration fees are separated from the vehicle and becomes Registration Credit and the owner will retain the plate.

In order for a customer to receive a Registration Credit, they must be a Level 3 Customer. See [Customer Account Requirements \(Level 3 Customer\)](#) for more information.

If the customer is not a Level 3 customer, the service will just spin in MAX as shown:

► Eligible Fees

Requesting Registration Credit

The owner(s) may request the funds (registration fees) to be transferred to their Customer Account. This can be done by a CSR, or the owner through AZ MVD Now. View the [Registration Credit with Multiple Owners](#) section for more information how credit is handled.

At the time the credit is requested, the \$12 Registration Credit fee is automatically deducted. If the customer has \$12 or less in Registration Credit, MAX will display a message 'No credit is available.'

If the funds are not transferred, at the request of the owner, to their Customer Account, the funds will decrease each month.

The Request Registration Credit service allows a CSR to issue a credit for eligible fees. View the [Requesting Registration Credit](#) section for more information.

Once the funds have been transferred to their Customer Account, the owner can request a disbursement of funds, or can leave the funds in their account and use the funds toward the payment of any future Division service. View the [Request Customer Disbursement](#) for more information. If multiple owners, view the [Registration Credit with Multiple Owners](#) section.

When a new owner of a vehicle is entitled to the plate and/or registration credit (e.g., non-probate, probate, etc.), registration credit may be applied during the service. View the [Titles Without Court Orders](#) topic > [Customer Entitled to Plate and/or Registration Credit](#) section for more information on how to handle the plate and/or credit.

Registration Credit with Multiple Owners

When there are multiple owners on an Arizona vehicle title record, the Registration Credit will still be transferred to a Customer Account. Most of the time the credit will be transferred to the first owner making the request, regardless of the legal status between owners, but if more than one owner wants a share of the Registration Credit, you will have to take a couple extra steps. View the below chart for more information.

All owners technically have a right to the credit.

If one owner makes the request and the credit/funds are transferred to their Customer Account, the owners will have to determine if one owner will keep all of the credit, or if funds (full or partial) need to be transferred to another owner's Customer Account.

View the [Transfer Customer Account](#) topic for more information how to transfer funds.

View the [Request Customer Disbursement](#) topic for more information on disbursing the funds.

Customer Does Not 'Request' Registration Credit

The balance will remain associated to the Vehicle and decrement monthly until there is a zero balance.

If the customer does not request the Registration Credit, the credit balance will decrease monthly until there is a zero balance. When the Registration Credit is requested and deposited into the Customer Account, the balance will NOT decrease.

Disbursement Check for Credit Goes Unclaimed
