

Title and Reg Recreate

T & R Recreate is a service designed to allow MAX users to recreate title records for an Arizona vehicle when the existing data did not successfully convert from the previous legacy system (TPX) to MAX.

Use the T&R Recreate service only for title records with inactivity.

DO NOT USE to recreate the registration part of the title record.

This service should only be used when title data already exists, but did not fully populate the MAX records.

- To create new title and registration documents for a customer use the [Title and Reg](#), [Registration Only](#), or [Title Only](#) services in MAX
- To correct errors in title and registration documents use the [T & R Corrections](#) service
- To update information on title and registration documents when details have changed, use the [Update Registration](#) service in MAX

Before a T & R Recreate service is initiated, the existing title record should first be searched for in Accommodative Data Search - [Vehicle Snapshot - Accommodative Data](#). If the original record is found they should be used to add/complete any missing data in MAX.

If the ownership is being transferred and the record has been purged, you will re-create the record in the prior owner's name first (exactly as the Arizona title states) and then transfer the title to the new owner in MAX.
