

You are here: Title & Registration Services > Plates > Transfer Plate

Transfer Plate

Transfer plate allows customers to optionally transfer an existing plate, rather than keeping a current plate or selecting a new plate, as part of a Title & Registration service. Plates can be transferred between the customer's own vehicles or customers can transfer an existing plate owned by another customer if it is current or expired for less than one year. When transferring an existing plate from one customer to another customer a Plate Relinquishment form (a.k.a. [Plate Notice, form #48-3302](#)) will be required as part of the service.

If the plate to transfer is a personalized plate that exists as multiple plate types (e.g. standard plate and motorcycle plate), you must carefully select the correct plate type during the MAX plate transfer service.

View the [Personalized and Special Plates](#) topic > Transferring a Personalized Plate section for more information on fees and requirements on transferring plates.

If the plate is part of a title service in which in the new owner is entitled to the plate and/or registration credit, view the [Titles Without Court Orders](#) topic > [Customer Entitled to Plate and/or Registration Credit](#) section for more information on how to handle the plate and/or credit.

When an owner is being added to an Arizona vehicle title record, this will begin a new registration cycle. MAX is acting like adding an owner is a transfer of ownership (partial transfer) and will require a \$12 Plate Transfer fee to be charged on any applicable personalized and/or special plates.

Transfer Plate function is available in any Registration service in MAX, including:

- Title & Reg
- Registration Only
- Renew Registration
- Update Registration

If transferring a plate from a vehicle that is actively registered with that plate number, that registration will be automatically canceled once the plate is transferred to a different vehicle.

If a customer wants to switch plates on their active registrations (e.g. move plate A to vehicle B and plate B to vehicle A), see [Switching Plates Between Two Active Registrations](#) below.

Completing a Plate Transfer as Part of a Registration Service

- ▶ **Switching Plates Between Two Active Registrations**
- ▶ **Transferring a Plate to a Different Vehicle with the Same Owner**
- ▶ **Transferring a Plate Between Two Vehicles with Different Owners**
