

You are here: Title & Registration Services > Vehicle Management > Vehicle Domicile Address

Vehicle Domicile Address

The vehicle domicile address is used to indicate where the vehicle is housed or stored, if different from the customer's residential address (e.g. storage yard, or winter cabin, etc.).

Where a vehicle is stored / driven may impact emissions requirements.

The [Adding a Vehicle Domicile Address During a Service](#) service is available **during** any registration service or in the Vehicle Information Page when not in a service.

Inform the customer that when the vehicle is no longer located in a domicile area they will need to update the domicile address in an MVD office. Customers are not able to change the domicile address in AZ MVD Now.

If the customer has a restricted record, and a change is needed on an existing domicile address, OIG must be contacted in order to make that change.
