Vehicle Inspections

A Vehicle Verification Inspection verifies the Vehicle Identification Number (VIN) is in agreement with the vehicle in the applicant's possession and establishes an identity for a vehicle that is without title and/or registration. There are three levels of inspections.

Type of Inspection	Why is it Completed?	How Much Does it Cost?
Level I	To match the public VIN and secondary VIN to the vehicle's ownership documents (if available) to determine the identity of the vehicle.	No cost
Level II	To match the public VIN, secondary VIN, and the confidential VIN to the vehicle's ownership documents to determine the identity of the vehicle.	\$20.00

Level III	It is a combination of a Level II Inspection plus verification of VINs (at the discretion of the inspector) on some or all component parts to determine the identity of the vehicle. To determine if the vehicle is properly equipped for highway use (meaning the vehicle is able to be legally driven).	\$50.00
